Subject: Ap17/00358planning application Horndean Rd/SourhleighRd

Hello,

If this development goes ahead it will add hugely to the traffic leaving via the Horndean Road to go north, and also south thus avoiding the level crossing at Warblington. The traffic at the crossing is already a problem, especially at peak times with queues reaching the Havant Road end of Southleigh Road and far up towards Denvilles.

Plans must include a method of traffic management, taking traffic away from these areas before congestion becomes a real problem.
