

I spoke to a planning officer recently with regards to my deep concerns and objections with regards to the building of a care home and the building of 4 semi detached houses.

He asked me to put my concerns into writing before the end of the year.

I have lived in 56 Hart Plain Avenue now for some 50 years which is opposite the tennis courts.

For all these years I have seen the amount of cars that park in the road from top to bottom on both sides and it is getting worse month on month. All drivers ignore the double yellow lines and park anywhere.

They park from 7.00am until at 9.30am and again from 2.00pm until 4.00pm. The times are consistent with the Schools finish. Hardly any of them use the parking facilities in the school. On top of this Hart Plain Avenue from Milton road is also

a short cut for traffic going from Milton Road to London Road and from London Road to Milton Road. Therefore this proposed development of a Care Home and New Houses will make

matters even worse than they are at present. With all of the parking in the road etc I have difficulty in getting out of my drive. On many occasions I have to ask drivers parked if they would move in order to get my car out with many objecting which has caused heavy language.

I am therefore very concerned about this development that will only make matters a lot worse.

The owner of this land [REDACTED] is not bothered about the problems this would have and cause. I have had no interested response from him in the past when voicing these concerns.

So for the reasons given I believe like many others that live in Hart Plain Avenue this development needs serious consideration and refused/turned down.
