Dear Sir / Madam

Re: Ref APP/18/01099

I am writing re: my concerns about the brick extension proposed for my next door neighbour, 201 Highlawn Way.

I have a glass conservatory on the back of my house it measures 2.17 metres beyond rear wall to back garden, height is 2.47 metres sloping to front of conservatory to 2.15 metres and is all glass.

This was built approximately 25 years ago. The left side, facing out, has already had the light taken away as Mr Stickland has built a "lean to" to store their bikes, this is attached to a conservatory they already have in situ.

As you will see by the proposed measurements it is much larger therefore it will take our light and warmth.

Mr Stickland has already had a dormer in the

loft^{built} which already shadows our conservatory
until approximately 13.00 hrs.

Perhaps a smaller single storey development
would be kinder, allowing us to enjoy the
light and warmth that they will enjoy.

Thank you

Kind regards
