Ref APP/21/00362

Dear Miss S Donophy,

As you can see from my address, I live in [REDACTED]
to the garage entrance in question to the rear of 36 Osprey Drive. [REDACTED]
[REDACTED] and I have lived here since they were built over 35 years ago.

I fully support planning permission for this extension and am writing now as I am surprised it didn't automatically go through.

I have NEVER had any parking problem or noise problem associated with this garage before the extension or since. My wife and I, each with our own car, have always been able to access our cars and turn around in the very large turning area, even with cars present in the bays. We have never been blocked in, or out, or inconvenienced in any way by the very small number of clients involved who only turn up one at a time anyway. We are part of a large family, all with cars, who visit us and park in the part of the road outside our house or very nearby, who have never expressed any problems at all with parking or turning around.

Equally, we have never been disturbed, upset or even aware of any noise problem. Gardening out in the front garden or back garden there has never been a noise problem. I am far more aware of my six grandchildren's noise, shouts, screams, arguments, football in the road, skating in the road, etc etc when they visit, than any noise emanating from the garage!

I have also never had, or heard a complaint, from the [REDACTED] as a Neighbourhood Watch coordinator for this local area regarding parking or noise.

Fitness and exercise is to be encouraged, especially at a personal level, not just for team sports. In this computer screen, X Box, smartphone and TV age this should be admired, respected and fully encouraged.

This planning application has our full support, retrospective or not.

Yours sincerely

[REDACTED]
