Subject: RE: 20A Aston Road - additional information required

Hi Ms Lealan

I can confirm the situation is the same as last year, the rear paving is in place and will not be disturbed so I believe an Arborocultural statement will not be required.

Regards

David James

Dear Mr James,

I am now in receipt of you revised application for this site and am awaiting consultation response from our highway engineer. Please could you refer to the email chain below and advise if the situation regarding trees that are adjacent to the rear boundary and hard standing is as you proposed below and that there will be no construction works in the vicinity of the trees. If this is not the case please provide an arboricultural method statement.

Kind regards
Heather

Hi Ms Lealan

I can confirm that the rear of the property is paved over so the car parking spaces will be painted for marking, so there should be no disturbance to the tree.

Regards

David James

Dear Mr James,

Further to our discussion this afternoon, I have now received response from our Tree Officer and can confirm that a Arboricultural Method Statement will be required to be

submitted before the scheme can be assessed with regard to the off site protected tree. Please could you submit this for our consideration before 12 October 2015. If this timeframe is too tight please let me know.

I am still awaiting comments from our highway engineer and I will provide further update if changes are required.

Kind regards
Heather
