

The effects that the Tournerbury Wood's Wedding Venue Right of Way is having on our Personal Lives and Well Being

①

1. Huge effect on our quality of Life
2. Anxious over who is about at night
3. No gate for Security (we wanted to shut Farm Gate but threat of injunction)
4. No security. We have no idea when or who is coming and going. Guests are roaming all over Farm and Golf course
5. Theft from yard. Steddle stones
6. Rubbish, glasses and bottles thrown out of vehicles
7. Going to the toilet in our Barns and Stables. Stables are away from right of way (see 4)
8. Being Sick and urinating in yard when drunk
9. Taxis, guests' vehicles, Double decker buses and coaches in and out all day and into early hours of morning. Taxi drivers knocking on our door at 1am asking the way.
10. Massive increase in traffic since wedding venue started. Sometimes 3 functions a week, during the summer, so with setting up and clearing away we are talking every day.
11. We have grandchildren and are unable to let our 6 yr old play outside as her father did. Our elderly dogs are at constant risk as people pay no heed to the speed limit.
12. Sadly, when people have been drinking a few can become aggressive (police called) we have tried to avoid direct confrontation but worry for ourselves. [REDACTED]
13. The noise the traffic and people leaving the venue has made sleeping very difficult for us all but add to that the worry of who's out there is having an has impacted on our health.

The effects that the Tournerbury Wood's Wedding Venue Right of Way is having on our business. Tournerbury Farm and Tournerbury Golf Course

2

Health and Safety.

There is a huge risk to people coming through the middle of a working farm. Most are not aware of the dangers this incurs.

1. Tractors, Forklifts and Diggers have limited visibility therefore cannot always see vehicles or pedestrians. Wedding guests don't seem to be aware of this. There have been a few near misses despite the speed limit. This is a danger to our staff as well as the guests themselves.
2. The loading and unloading of Lorries, which is part of everyday farm life, poses another risk.
3. The golf course machinery and equipment constantly use the yard area as part of everyday activities.
4. Having Diesel, fertiliser and chemicals on the Farm also poses a risk to security.
5. The movement of cattle and in and out of the farm yard has been difficult with vehicles coming through.
6. We have little, if any Bio security because we have no idea where these guests are coming from, bearing in mind some are walking through the yard.
7. Horses being led out to fields and ridden have had several near misses by speeding traffic.
8. High risk of Fire to Hay Barns. People have been caught smoking sitting on bales, waiting for Taxi's or Lifts.
9. Does Mr Snell have insurance should one of his guests set fire to our Barn. Have risk assessments been done? Thus, increased risk will occur costs to us with our insurance.
10. Wedding Guests believing our Farm is owned by Mr Snell trespass over the farm and Golf Course leaving gates open and letting livestock loose and helping themselves to Golf balls.
11. Guests getting lost have had to have vehicles rescued, by us, through going the wrong way and getting stuck in ditches, fields and even on the sea wall.
12. There would also be an impact on any of our future on Farm diversification as loud noisy guests and speeding traffic would affect this and therefore our business.
13. There are two family houses and this right of way passes between them, so the noise and dangers affect both.
14. Despite caution signs and a 5mph speed limit we have concerns for the safety of our golf customers leaving the car park meeting speeding guests.
