10th April 2018

Dear Mr Eaves

Re; - Planning Application 18/00198

I write simply to endorse the objections of the other local residents who have communicated their thoughts to you on the above planning application. It seems perverse that the applicant would apply to store scaffold in an area adjacent to which Havant Borough Council has previously considered unsuitable for the purpose it being so close to domestic dwellings.

The area in question used to be the garden of 132 Havant Road and as far as I am aware no planning application has ever been made for change of use of the Garden. The Ownership of the field to the North of 132 Havant Road was at the time separate from no 132.

I am surprised the Environmental Health Manager appears satisfied with the natural drainage in the area, as in recent years, the ditch shown in Red- chain-dot on the enclosed plan, has been filled in – the consequence being that the northern half of the field "A" is permanently under water for approximately two-thirds of each year.

The ditch which ran along the back of No 130 Havant Rd together with the twenty four inch diameter pipe that ran under the original bungalow at No 132 and discharged into the field to the North were both destroyed during the construction of the present No 132. This severely compromises the drainage of field 'B' and flooding discharges through my Garden and onto the public Highway (A3023) during almost any continuous rainfall.

I am aware of the foregoing as I have lived here for [REDACTED] years.

Yours Sincerely,

[REDACTED]

Mr JG Head
