Dear Mr Speller

RE: Application for planning permission for extension to 31 Wraysbury Park Drive – Your ref APP/21/01213

I have received another application for the above extension at 31 Wraysbury Park Drive and I want to continue to voice my objection. The original objections still stand as the proposal takes away a significant portion of the parking on my drive as the proposed extension will make it impossible to open the car door that is nearest the extension reducing the portion of my drive that I can park on. For the last forty years I have had the ability to park two cars there now this will be taken away. I am [REDACTED] and as my mobility decreases will need to be able to park near my house and have sufficient room to manoeuvre out of a car in the same way that extra space is allocated for this in disabled parking spaces. Not being able to open a car door along the same length of my drive as I currently am able to do will severely impact my quality of life. The rationale for the objection is that it has a detrimental impact on a neighbouring amenity as it takes away my existing facility to park my car and cars of visiting family. With the extension built there will be insufficient room to open the door on the extension side of the proposed development. [REDACTED] and need to park on my drive as it would be too far for me to walk from any roadside parking. This would be extremely detrimental to the quality of my life. It will also put extra pressure on parking in the street. In addition, I believe the two-story build will overshadow my property and cause a loss of light and privacy to me.

Yours sincerely
