

This is only a temporary structure, bolt together pre-fab sectional garage, there is no water or electric going to it. Kept at low height, not blocking any one view, and to keep the front garden tidy, less of an eye saw and noise level lower so as not to annoy the neighbours.

We only plan to have this for the next 5 years

If you require any further information or wish to visit to inspect that this is a temporary structure please do not hesitate to contact me.

Regards

Mr and Mrs Williams
