

Dear Sirs

Please accept this letter as my objection to planning application APP/19/00883 for 2 x 2 bedroomed properties in the garden of 93 Winterslow Drive.

I have lived here for 33 years and in that time have flooded twice due to the rainwater coming down the hill straight into my property. The addition of even more concreted/tarmacked area is only going to increase that risk.

Although the plans have changed as to where four vehicles can park it is still not taking into consideration that most households have two cars or more per property, there will be 3 properties = 6 cars. The tenants of 93 do not use the garden as the ground gets too wet and the vehicles sink into the mud, they currently park on the driveway which means they will no longer be able to do so which will mean using already overcrowded parking spaces.

I still have huge concerns in the safety issue of cars going into and exiting the property right across the front of my property and having to cross a pedestrian walkway

As said in the previous objection letter re application APP/19/00635 the area suggested is not appropriate for development regardless of how many properties are proposed as god forbid there is ever a fire in one of the properties the emergency services would have a very difficult time getting access.

The fact that the owner does not live in the area and has no idea of the problems this will cause for those of us that do is very frustrating to all of us concerned.

Kind regards
