Comment Reasons:

Comment: This large, newly built structure situates itself in the midst of a small, quiet residential Close. What is this outbuilding to be used for? It has been intimated that it may be used, at least in part, as a workshop (property owner is a builder), possibly to include a wood burner, which raises noise and air pollution concerns. The wooden structure would not be visually in keeping with the brick built houses in the close should the current surrounding roadside border greenery be removed. Can it also be confirmed that the structure would not be used as a building for residential purposes?
