Havant Borough Council

Re: Very large tree at bottom of garden Abbeywest House 160/162 West Street Havant
PO9 1LP

Dear Sirs,

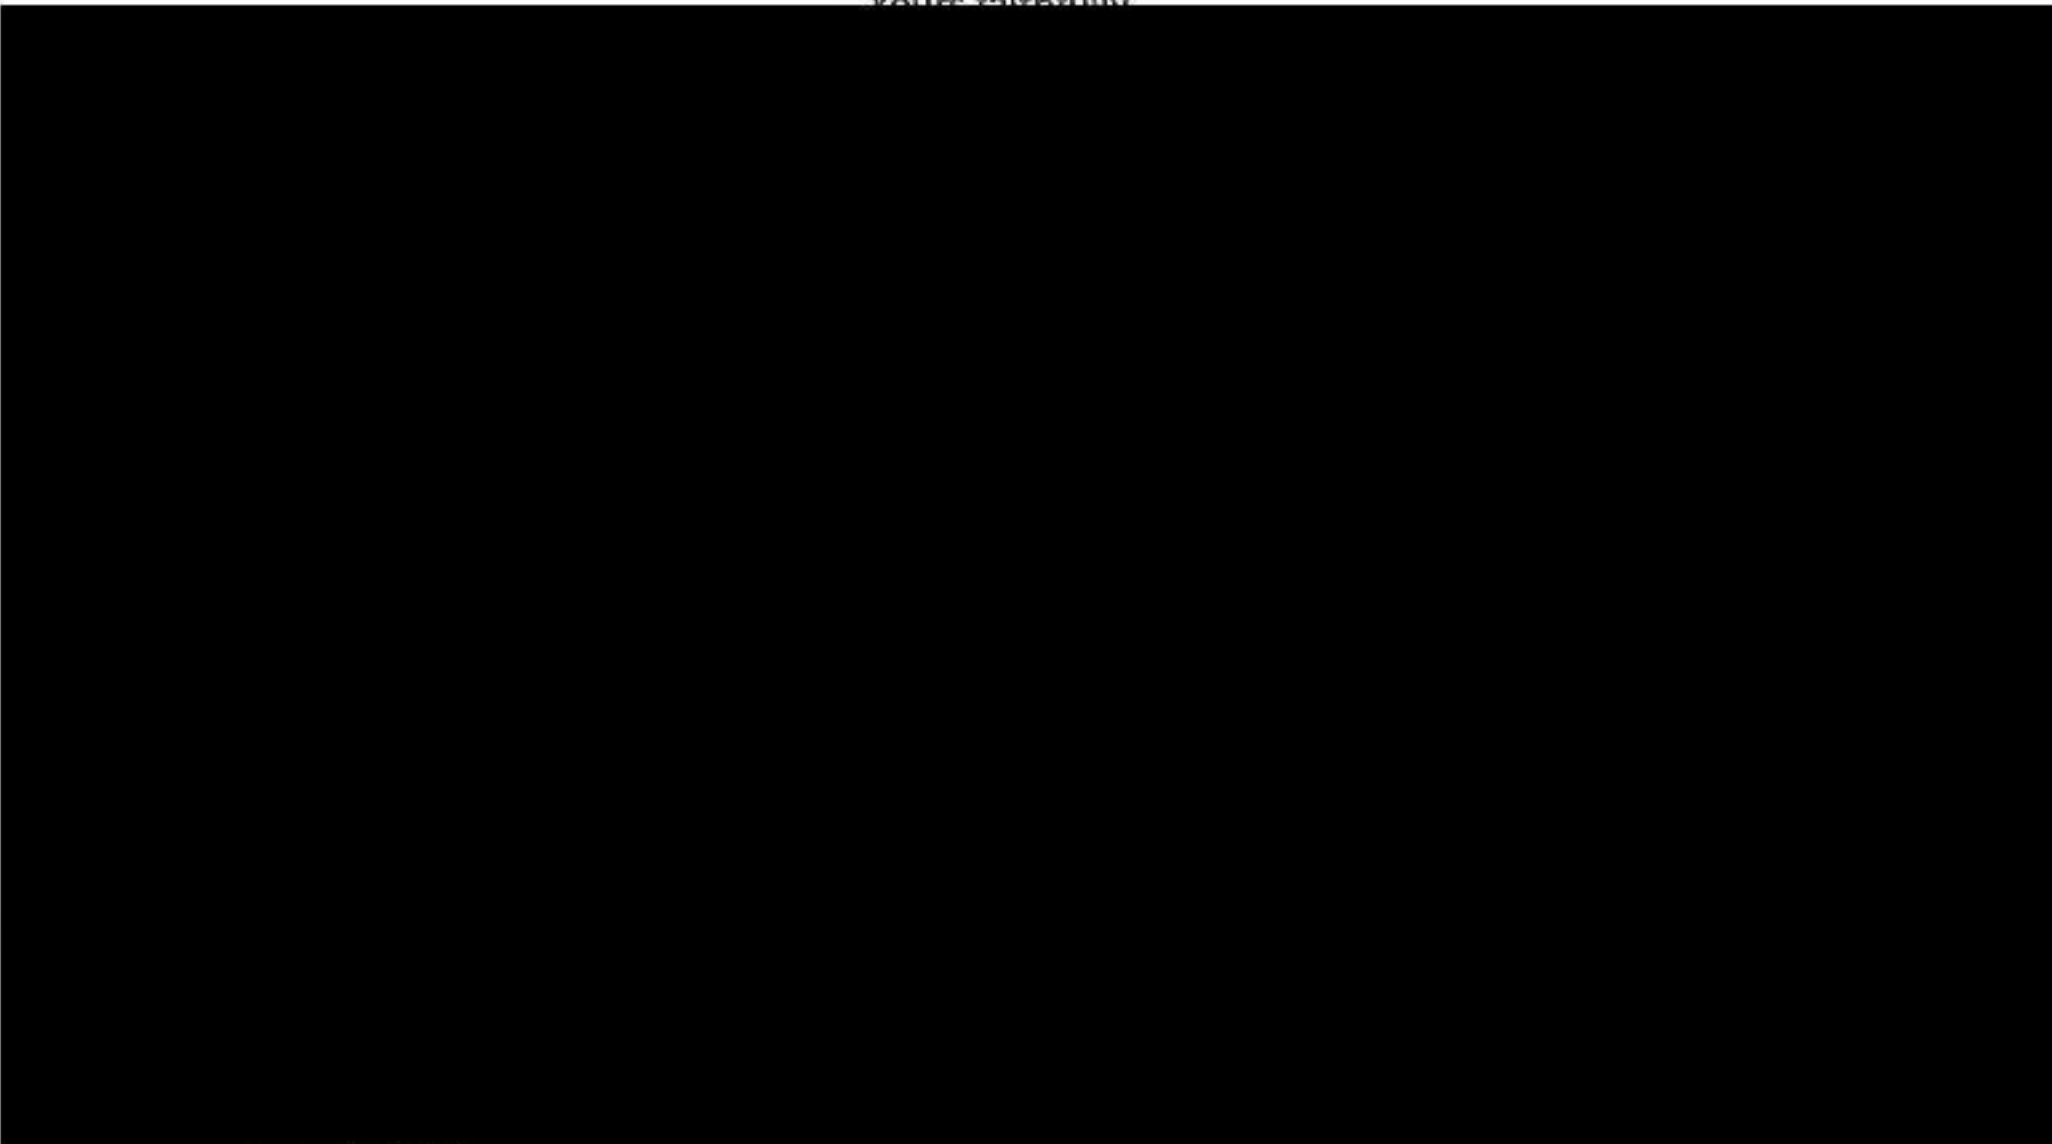

We the undersigned residents of Staunton Road and Western Road would like to see the above tree felled to the ground. It has reached the size where it is causing complete distress to us all. The leaves have started falling and it is a hazard when wet. We are afraid of slipping when we walk outside the back door as it is very slippery owing to the wet leaves on the step and path. (Please see letter from )

 It is a nightmare trying to pick them up and dispose of them in a responsible manner.

Whilst in leaf it blocks out light and sunshine to a considerable degree. We are also very concerned about the roots as they are damaging the Victorian wall which defines the boundary at the back of West Street and Western Road properties. It would cause enormous damage to the properties and injure people if it were to fall. The roots must now be very close to the sewerage pipes of Nos. 27 and 28 Staunton Road.

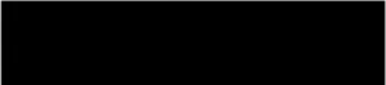

Whilst it is a lovely tree, it is not suitable for an urban garden. It is best suited to an open space such as a park.

Yours faithfully,

17th October 2018

Dear 

Re: Abbeyfield House Tree

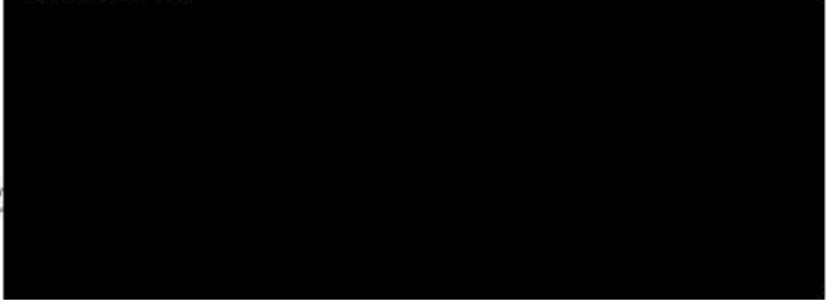

As a property North East of the tree in question we suffer probably more than most from the debris caused in windy periods thanks to the prevailing South Westerly winds.

We wrote to the council in support of the planning application Abbeyfield House submitted to remove the tree a year or two ago. Sadly the council continued to reject the requests from the society to remove the preservation order.

Over the next few weeks, due to work commitments, we will not be readily available to sign the letter however please take this letter as support for the campaign to remove the preservation order which protects the tree from removal.

In our absence please feel free to mark any letter reflecting the above as signed by proxy through the authority delegated in this letter.

Regards

Dear Mr and Mrs Wannerton,

I would be extremely happy to add my signature to the letter that you are going to send to Havant council, I have lived in [REDACTED] for the past 25 years and tree in Abbyfield has taken more and more light from my garden every year and spoils the enjoyment of using the space.

The leaves are not only annoying they are also a safety hazard, last year while cleaning away the leaves I slipped and hurt myself I was covered in bruises for weeks [REDACTED] time and now feel very nervous about completing the task again this year.

I would also be very happy if this letter was included, as I think they need to understand the impact on a person's life.

Thank you for organising this process.

Kindest regards

[REDACTED]

13.10.18

Dear [REDACTED]

I shall definitely sign any letter and give photographing evidence of the damage to the wall!

I have searched online and there is no TPO on the tree, but it is in a conservation area. Out of interest, the Victorian wall that it is damaging is named in the conservation order, more ammunition possibly?

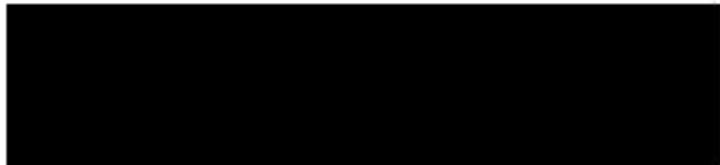

Many thanks
[REDACTED]

The Very Large Tree at the bottom of the Abbeyfield House
garden in West Street

GOOD NEWS

We have just received a phone call from the area manager to say that a tree surgeon has just visited the garden and looked at the tree and said it should come down. It is a beautiful tree but not suitable for a garden, it should be in a park.
It will not happen immediately.

Thank you for your support

E. Neill

Abbeywest
Re! Tree in ~~Abbey West~~ House
160/162 West St. P.O. 110

Dear [redacted]

Please could you give us information on setting up a petition to have the very large tree cut down in the back garden of the above property? We have a few signatures at the moment, with more to come. It is a type of Ash tree and has reached such a size that it is causing problems for many of the neighbours with adjoining properties/gardens. The leaves that fall are causing a hazard for ourselves and our neighbours. It was trimmed back about 2 years ago and is now growing more robustly. We know that the Abbeywest would like it down as they did try to get it done.

There is also a Victorian wall that runs along the north side of No 27 Staunton Rd and right down the back of the houses in Western Rd. It is now leaning due to roots of this big tree. This is obviously very dangerous. We are also concerned about our sewerage pipes which run very close by in garden of No 27 Staunton Rd.

I enclose a copy of a letter, written by [redacted] also a photograph of tree, taken by me.

Hope you can help in this matter

Yours faithfully
