To whom it may concern

As a [REDACTED] neighbor I am writing to give my support for the retrospective planning at Hayling garage.

In my opinion the new building has given Hayling garage a smarter appearance to the south of the building, I can confirm it hasn't created any extra noise or inconvenience.

Living next door to the oldest garage on the island for numerous years ive witnessed a increase of work volume which i can only assume its down to the increasing number of houses and flats being built on the island.

The new building clearly allows them to turn the work around quicker and without it would dramatically effect their ability to continue to serve the community in the way its needed.

Yours sincerely
