

It was nice to talk to you reference the planning proposal of the 14 illuminated post mounted signs on the Pebble Walk development.

These are NOT proposed, they have been up for approximately 6-8 weeks, as were the flag poles & flags that were only taken down recently.

I have already complained (by phone) about these illuminated signs (that are lit 24 hrs seven days a week) as they are extremely bright, giving major light pollution. There is also no need for them as the site and site office are closed in daylight hours so are not providing any benefit to the estate but causing an obtrusive light source to the adjacent properties especially the rear of 6 & 10 Sinah Lane.

[REDACTED] also very unimpressed by the bright light of these signs & is fully aware & supportive of my complaint.

My wife and I are against the erection of these 14 illuminated signs and request that Havant Borough Council refuses planning permission & gets these removed as soon as possible, The fact that Barratts seem to think they are above local planning permission & have erected, on more than two occasions various signage, flags & flagpoles is something the council needs to monitor.

I look forward to hearing from you and am happy to meet you, if you like, when you visit the development next week.
