Dear Sirs,

We are in receipt of your letter asking for comments on the above planning application.

We live adjacent to the property requesting the application and have been advised by our neighbours Mr and Mrs Price of their intention to carryout development on their property. Mr and Mrs Price have been very sympathetic to the wishes of their neighbours and have personally advised us of their proposals and the changes made following observations by other affected local residents.

In general we approve of the proposals and feel the alterations will blend in well with the other houses in Marine walk.

We would ask however, that as we have a very close boundary to Curlew on our Eastern side and the proposal offers accommodation on the 1st floor, which will extend the roof area in front of a bedroom window that we have at our 1st floor level. We are minded that although the proposal does not include any windows in the roof on the west side it would be possible in future to install windows in the west roof elevation. This would seriously undermine any privacy that we enjoy in

our bedroom and ask that it might be possible to make a ruling under the application that no widows (including Velux style windows) can be installed in that roof without a further application approval.

We hope you are able to accept our observations and include our wishes in the approval.

Yours sincerely

Robin & Linda Davison
