Re: Planning reference APP/22/00818 – HRA (Solent Recreation Mitigation Strategy) in relation to Portsdown View Care Home

Dear Gill,

I am writing in regards the above with the aim to provide assurances that our 'care sector' operation and most importantly residents are not applicable in our opinion to SRMS

We provide full-time general nursing, palliative, respite, dementia and special needs care for residents aged 65 and over

All of our incoming residents have their full care needs assessed and reported, firstly by General Practitioners', NHS or Private Hospitals' and other social care authorities before being accepted to our Home

90% of our residents have physical conditions that limit their mobility and therefore they require assistance with walking (beyond 200m) and or any form of travel

Sadly, very few residents are able to leave the Home, on any regular basis, for any form of external visits'. When the weather permits, they are able to take advantage of our wonderfully landscaped gardens for exercise/general wellbeing which have 'accessible' areas throughout

I trust the above clarifies the operation of our care home adequately however, if you require any further evidence or information please do not hesitate to contact me

Regards

Rob Stone (Operations Director)
