Subject: Our Ref: APP/19/01190 Ask For: Ms L Wells

Dear Ms L Wells,

I am emailing in reference to the proposed plans for APP/19/01190 Site Address: 162 Stakes Hill Road, Waterloooville, PO7 7BS. The proposed erection of a 2 1/2 storey block of 7 apartments after demolition of existing dwelling, utilising existing access and with provision of car and cycle parking and bin storage.

I have received the revised proposal reducing the number of apartments from 9 to 7. However my objection remains the same. The number of apartments is still too high and would cause excessive traffic to the road and substantially increase risk to school children using the pathway daily. There is also cause for concern with sewage issues that occur in Durham gardens and the already limited parking. The construction of these properties would cause inconvenience to those living around the site and will impact their quality of living both during and after construction. The road is busy and congested at present but further traffic will cause even more disruption and inconvenience in the lives of the people living around the site.

In addition to the above my previous comments remain the same. As below:

Reasons for comment:

Comments: I am against the construction of these flats. This is primarily due to the increased risk and safety of the school children who use the footpath to walk to and from school twice a day.
In addition to this, the road next to the proposed property, Durham gardens is already heavily congested and this will further add to the congestion. Making it impossible for current residents to be able to park down their own road.
Personally, I struggle daily at present to park down my road due to the number of vehicles parked down my road. I am sure that these flats will make the struggle worse. If these flats are constructed I am sure there will be occasions when I can't park down my road. And if I return home late at night I shouldn't have to park down another nearby road just because the area has been ridiculously built up.

down my road. And if I return home late at night I shouldn't have to park down another nearby road just because the area has been ridiculously built up

Thank you for taking my comments into consideration.
