

ATTN MR D. Eaves.

HAVANT BOROUGH COUNCIL

14 FEB 2022

RECEIVED

Dear Sir/Madam

Your Ref APP/21/01434

I wish to object to the above planning application on the following ground.

1. Loss of valuable farm land wildlife habitat deer / Brent geese migration stop off Site
2. Site entrance - we already have congestion at that junction School in that road - lots of children - Tornabury pbs housing estate built in the last couple of years - another 300 houses all using the same entrance. 30 flats are proposed for brown field site (pullinger old site) more cars retirement flats just finished in St. Marys Road. how much more can be crammed in this little area.
3. The pressure on our overton services ie Doctors/Dentists they are already overwhelmed.
4. So many "little" infill sites already ie Seafront flats West Town flats - Sinah Lane Houses - and more being sneaked in.
5. People need to leave the Island to find work - not a lot on the Island - day & night. - The younger generation have nothing to do except wander around.
6. We seem to be quite famous for our Sewage system so not only "300" houses but all the infillings not mentioned

6. ^{Cont} With our infrastructure - can we cope definitely not just look at the experts advice.

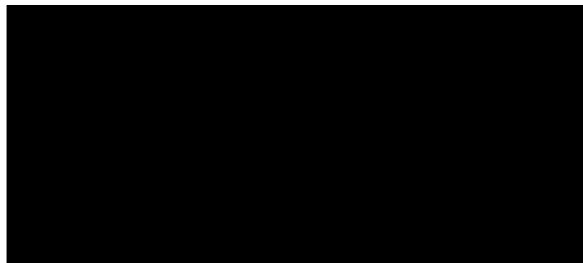

7. Island gridlocked at Time - Summer is much worse - but positive note - holiday makers generate business for our little shops - cyclists love our Island which is lovely but they use the roads not the cycle ways. i.e (all that money spent on the bridge for them)

This little Island cannot cope we are sinking under concrete and you want bald houses on such fertile valuable growing fields. This can't be right.

Could you please reconsider this application - yes we all except the land is valuable - to the big house builders but much more for residents and lovely people to come to this precious little Island

So thats my rant Thankyou for reading it and hopefully we will be taken into consideration.
(Sorry about spellings)

Yours faithfully

P.S. 300 houses - am I wrong in thinking they applied for 280 seems to be creeping up.

Please look on this favorably
