Portsdown View Care Home, Post Construction BREEAM Assessment

Dear Rob,

I write to provide a summary of the current status of the BREEAM assessment and final certification for the above project that is registered under BREEAM reference BREEAM-0116-8509.

A post-construction site inspection was completed 24/05/2023 and reviewed by myself, a licensed assessor at AES Sustainability Consultants. No matters of concerns arose. Furthermore, the project team have provided sufficient evidence to confirm compliance with the targeted criteria.

Following the above, a formal certification report was submitted to the BRE for Quality Audit on 12/09/2023, with a recommended score of 70.40% being achieved with a rating of Excellent. BRE confirmed the assessment had successfully passed their audit process and provided final certification in line with our report and recommendation on 19/09/2023.

As such the formal assessment process is now at an end and the final BREEAM Excellent certification has been issued to the project team.

Yours sincerely,

Chloe Curran
