Dear Sir

Your Ref. APP/18/00234

I refer to the planning application to build a nine storey block of flats on the Wellington Way site. This is too high a building and would completely swamp St. George's Church. In my opinion the Church is the only building in Waterlooville worth looking at and it should be the dominant feature of the Centre. I do not object to a block of flats being built, but, in keeping with the rest of Waterlooville Centre, it should only be 3 or 4 storeys high.

A block of flats has machinery built onto the roof which would give it even more height.

Should even half of the tenants own cars there would be a major parking problem.

We do not want a monstrosity in the centre. Cities have skyscrapers not small towns. If permission is granted it would set a precedent and Waterlooville would become swamped by other tall buildings.

I do not think planning permission should be given to the proposed application as it is not in keeping with the rest of Waterlooville.

Yours faithfully

Lorraine Bland (Mrs)
