Ref planning APP/16/00449
Land adjacent to 50 Southfield walk po94hy

We would like to let you know that we strongly object to this planning application.

The land is publicly maintained highway. An illegal fence has already been erected and there is not the required gap all the way around the perimeter.

As the fence has been erected prematurely it has enabled us to see the difficulties we would face with the fence alone, prior to any more vehicles turning up.

Our Neighbours and ourselves have very restricted view of the traffic coming down berry down road and as this is also used as a turning point for many cars I feel the risk will be very high also for the many children that cross here.

I have attached some pictures of an average evening at the moment.

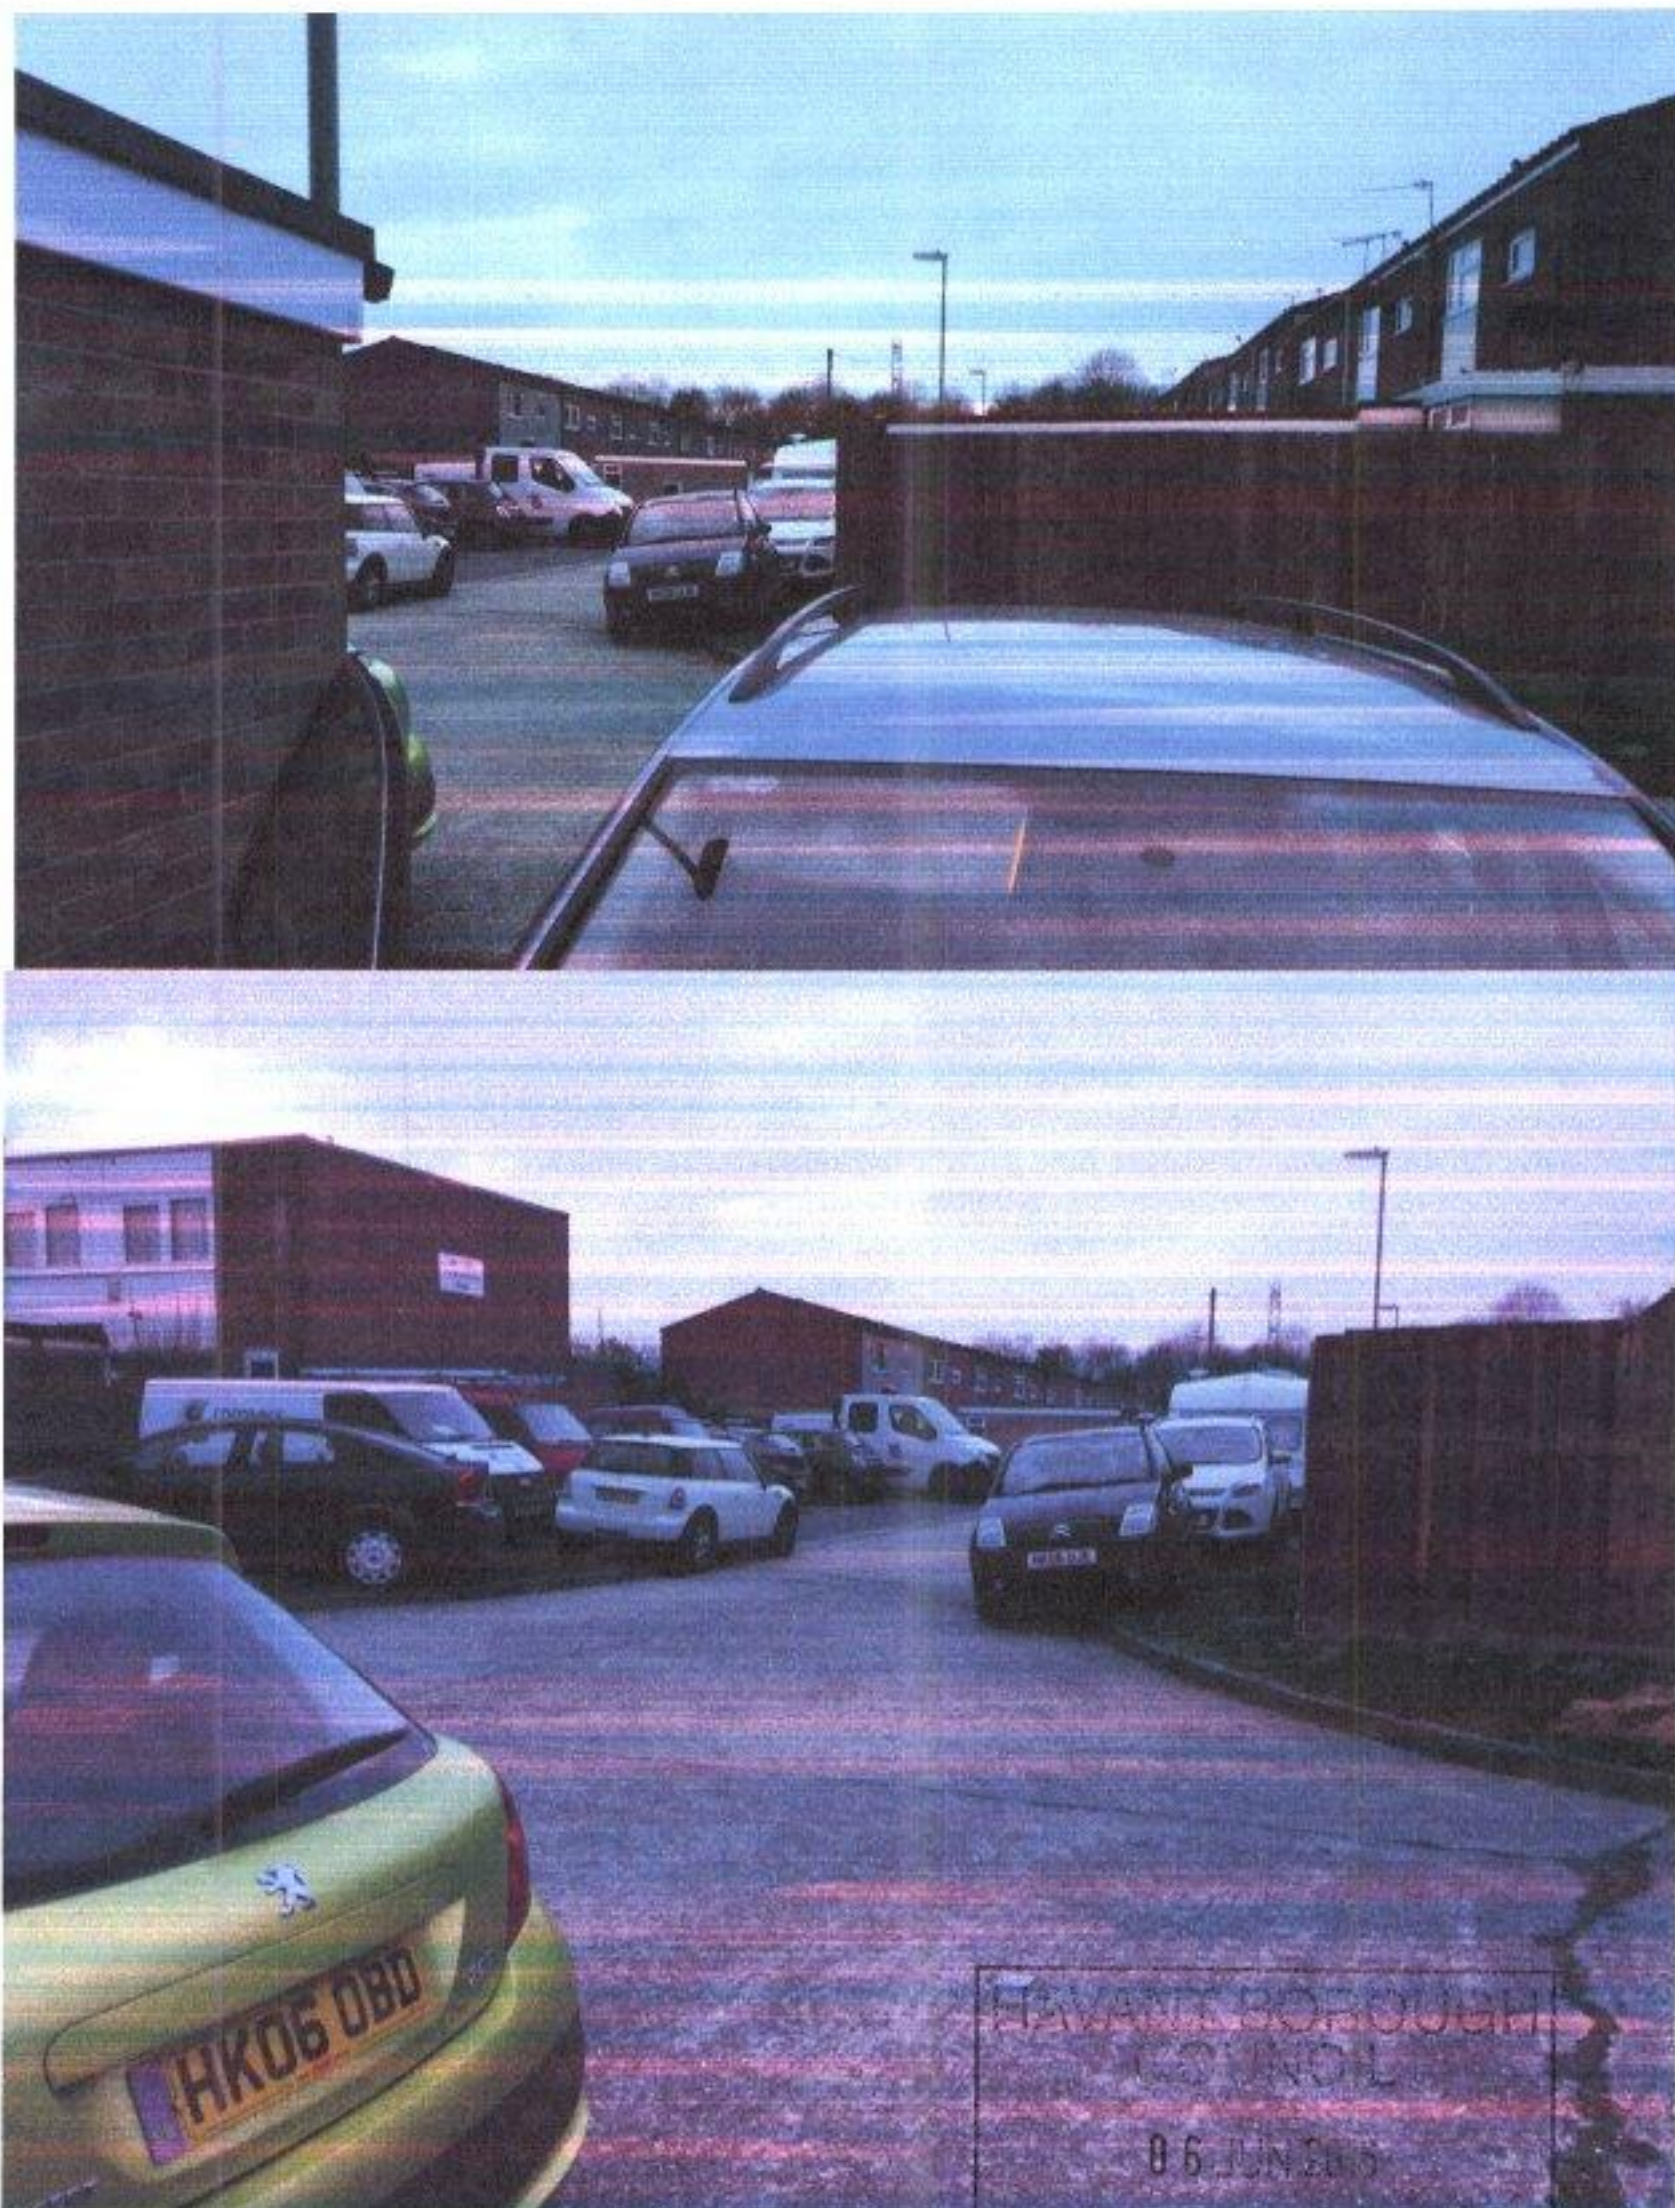

As you can see we are already very congested, at times there has been problems with residents due to the parking and I fear this will only worsen the situation.

The Emergency services use the land to access the woodland and flats at the rear of 50 Southfield walk.

I feel the property would close us and especially our neighbours in quite a lot.

There is no call for a house in this location other than as a financial gain to the owner there has been plenty of development on near by sites already.

The original plan of warren park left green spaces as the property's have very small gardens. If this house is allowed where will it end.

originally there was plans for a 4 bed and the reasons of which it was refused do not in my eyes differ to the new application for a 3 bed.

I hope you take our views into consideration when making a decision.
Many Thanks

Mr & Mrs Humphrey
