

ref. APP/21/00057

4-2-21

Dear Sirs,

I acknowledge receipt of your letter dated 28-1-21. Unfortunately, due to "lockdown", I am unable, totally, to make an estimate of potential loss of morning light/sunshine that would occur if permission were to be granted to the proposed extension to no: 7, Westbourne Avenue (already quite a large house).

As it is, I already have lost morning sunrise to my kitchen, due to the building of no: 5a Westbourne Avenue, and am distressed at the possibility of the same thing occurring to my study, which has a reasonable view to the houses on the south side of the road, and a reasonable amount of daylight in the mornings. I believe that the potential loss of morning light to both kitchen (already needing some artificial light) and the study, which is located immediately opposite a gap would cause inconvenience to me.

[redacted] I should have the option to sell my house, should I need, at some time to go into care. I believe this extension would make it more difficult to get a sale. I have lived here since it was first built. Yours [redacted]
