RECEIVED

ref: APP/19/00635

In reference to planning for 2x3 bedroom dwelling and parking at 93 Winterslaw Drive.

I strongly disagree with these 2x3 bedroom houses being built next to my property. I feel the houses will definitely overlook my garden especially as the houses have bedrooms in the roof and 2x windows in the roof will definitely overlook my property which this would be very intrusive.

As for the over crowding in this area it is beyond a joke at the moment it do not need adding to, it is very built up all ready so more people means more noise and more parking issues. As for parking issues it is a major concern. There is never no parking spaces day or night as it is we are constantly being blocked in our driveway at all times day and night which is already very frustrating so when people outside get blocked in they drive up on the grass verge and pavement outside the houses and my

property which is a major safety issue, how someone has not got knocked down already I do not know. As the plans say these houses have a parking space each which is all well and good but as you know most people nowadays have at least 2 cars which will mean more major parking and safety issues for the area. When people have family visitors with more cars outside it's already like a jam on a motorway outside our properties so adding more to this would be major. It's ridiculous already.

This is a very quiet area I feel it would be spoilt with noise and overcrowding if these plans go ahead with it already being overcrowded in this area it does not need more people and more cars added to it. And I also feel so strongly about my property and personal family space being jeopardised by the houses being built as this would definaitly be the case

Thank you
