RECEIVED

21st June 2022.

Dear Mr Speller.

Re: Mast Proposal St Johns Avenue.

As long term residents of the area we are not happy with the proposal of a telephone mast being erected on the green at St Johns Avenue.

We are unhappy with the noise pollution which will become apparent during the erection and afterwards, when the mast is functioning.

We were very happy to see trees being planted on the green and felt that at long last Common Sense had prevailed and the area would continue to be recognised as a quiet open space.

Obviously we are concerned with the devaluation of our property and in this day and age of make-do-and-mend Cannot understand a policy that is willing to disrupt an area rather than repair, update and upgrade existing infrastructure.
