

Dear Ms Wells,

following our conversation today I am stating my concerns regarding planning permission for 16 Lovedean Lane, Waterloooville PO8 8HH, [REDACTED]
[REDACTED]

On 27th/28th February 2020 vast amounts of foliage including a large Spruce, pear tree, Rhododendron and Yew (lining the back fence) were cut down. Before this happened I had total privacy and had no view of the cottage or the summer house.

I have a window in my hallway and two sets of windows in my kitchen that overlook the property, my house is elevated so I can see straight over the fence panels which are 6ft (photos attached).

I am aware that two properties if permission is granted will be built, obviously the second about 10 meters from my fence which is obviously of great concern to me. I have noticed on the plans it is stated that a new 1.8m high timber close boarded fence is to be built at the back. To my knowledge the right side of my property is my responsibility and the panels I have in place are only a few years old and the same height but defiantly not high enough now with foliage gone.

It is sad that a part of our heritage may be bulldozed and if this is the outcome it is a shame the developer did not opt for one larger property rather than two smaller dwellings.
