Good afternoon Marta

Further to our telephone conversation I have an application ready to submit to enable the change of the foul drainage condition from prior to commencement to prior to occupation. Would you be able to supply me a comment in support of this to enable the speed of this process.

I look forward to your reply

Kind regards

Good Afternoon Chris

Further to our conversation, as there is no evidence of public apparatus within the development site, I can confirm that Southern Water would have no objection to the change of drainage condition from pre-commencement to pre-occupation (or preferably prior to the construction of drainage on site).

Kind Regards
