

View on Lombardy Poplar tree (T6 on sketch T5 in tree report)
Regrown pollard now extending above and over neighbouring property.
Crown height is approximately 19 meters, and crown spread approximately 6 meters.
Remove regrowth back to original pollard point to avoid branch snap out.

Application Reference: 23ML060720

Havant Council Reference: APP/20/00537

View on Monterey Pine tree (T1 on sketch T19 in tree report)

Dying back in upper crown, low vitality.

Crown height is approximately 28 meters, and crown spread approximately 10 meters.

Remove all dead branches and continue to monitor. No reduction in overall height or spread.

PICUS test shows sound timber at base.

Application Reference: 23ML060720

Havant Council Reference: APP/20/00537

View on Monterey Pine tree (T2 on sketch T18 in tree report)

High upper crown with extensive branches over Goldring Close with excessive cone weight and dead wood.

Crown height is approximately 28 meters, and crown spread approximately 10 meters.
Remove dead wood and reduce branches on road side by approximately 2 meters.
