Dear Madam

Re: Application for removal/reduction of two oak trees on land to the north of 36 Herons Way.

Firstly when we purchased our house we were assured by the site manager that these trees could not be touched due to TPO in place. We do understand that over time it becomes necessary to trim some branches. However, we very much object to any healthy trees being removed. The two trees in question look the best out of all the oak trees in this vicinity, their importance to the local eco-system, wild life and local community far out way any individual proposal.

We would strongly question credence to the letter written by N. Bailey of 36 Herons Way with regard to the T junction. This is a turning point used daily by cars and lorries, not a parking space. As for children playing on or around the property we have never seen this.

Local children do sometimes play around the ditch at the end of Waders Walk adjacent to the T junction at the back of our house, the oak trees along that part of the ditch are full of dead wood and fallen branches on path way. To our knowledge nobody has applied to fell these trees so why would anyone agree to removing a perfectly healthy tree.

Yours sincerely
