Tree Removal – 21 Cavendish Drive, Waterlooville, PO7 7PJ

Over many, many years the trees in the rear garden of 21 Cavendish Drive have impacted greatly on my property, namely:-

1. The roots from these trees had been identified by my house insurers appointed experts to be the direct cause of substantial subsidence to my property. This led to a root barrier being put in place in my rear garden and several weeks of intrusive repair work to the building.
2. During months when the trees are in full foliage (summer) reasonable light is stopped from coming into my garden. This has affected both plant and grass growth extensively. The tree's overhang means the majority of my rear garden remains in shade.
3. Every autumn/ winter the leaf fall into my garden is beyond reasonable. This causes expense in both collecting leaves and disposal as well as blocking drains and guttering, which also several times a year have to be cleared as a direct result of the leaf fall.

I fully support the removal of the trees on 21 Cavendish Drive's property and look forward to the trees no longer adversely impacting on my property and my enjoyment of my garden.

Yours sincerely
