Planning Application / Remove of Tree North of 36 Herons Way

I would like to strongly object to the planning application for the removal of an oak tree with a TPO in place.

During this time of global warming it would be criminal for such a tree to be removed especially one that is so close to a junior school when currently there are serious health concerns regarding children suffering with health issues related to pollution when this tree would absorb a lot of these pollutants.

Also it would be very distressing for the children to witness the removal of a healthy old oak tree with all its history. I cannot imagine how staff would explain what is happening to these young students.

The person who bought this property recently, must have been aware that the tree has a TPO and should not have proceeded with the purchase if they were planning on building an extension, there were lots of properties for sale in the same site which they could have purchased instead of one with a beautiful oak tree behind their boundary.

Yours sincerely
