Dear Sir/Madam,

Re: Eastview, Manor Road, Hayling Island, construction of 1 No modern two storey, energy efficient dwelling plus car parking and refuse storage

Objects:

I have received your letter about the revisions being made at Eastview, although some issues have been addressed, it would only have a slight impact on the noise and fumes of the many cars using the parking area at the rear of my garden.

A few years ago an application including a parking area at the rear of my garden was rejected, one reason being it would greatly affect the peace and enjoyment I had and still have from my garden, so I would fail to see why this application for garages and a parking area in the same position should be passed now.

Also the properties that surround Eastview are older houses that have character, having such a modern house built in this back garden will not blend in with its surrounding, it will be detrimental to the outlook of all its neighbours.

Yours faithfully

Irene Sutton
