P07-SSP

Dear Sir/Madame,

I am writing
in response to your letter
about development [REDACTED]
[REDACTED] at 168.

I have no contact with the
relatively new owner, so I can't
explain to him, that making
the extension at the side would
greatly effect my daylight since
my upper window faces that
way.

The House, that is my house

was built in 1924, so its not my fault, the only light comes in facing their house, and it will be greatly blocked. My second worry is that it will devalue my home.

I still have a mortgage you see. My last worry is that he will damage a hedge separating both our properties.

The hedge is mine and full of sparrows, that I feed.

It is 100 years old at least. The RSPB, are aware of it. So its important to me as

3/

Sparrows are on the decline.

My feelings are shared by
the [redacted] house down from him,
[redacted]

Even the end house, at the
bottom is worried, and has
called my daughter for advice.
The lady at [redacted] is very worried.
When the drive went down it
destroyed a fancy tree, of hers.
Face to face contact would be
good. (But No).

He seems to only want to
make his house bigger.

Yours Sincerely
[redacted]
