Re: Proposed Residential Development
Land adjacent to Victoria Road APP/16/00319

Dear Mrs Lealan,

We are writing to advise you that we strongly object to the above planning application to build on the green field/land adjacent to Victoria Road for the following reasons: -

1. We understand the field floods at times. building on it would only increase this problem. possibly effect the existing surrounding properties.
2. The increase in traffic in and out of Victoria Rd would inevitably increase dramatically & exacerbate greatly the problem we already have when trying to gain access on to Havant Rd, (the only main road on & off Hayling) it nearly always has a constant stream of traffic in both directions & one usually has to wait for quite a long period of time before there is a gap in the traffic or someone kindly lets you out to join the traffic.
3. If allotments were to be permitted we presume there would be the inevitable bonfires causing additional pollution to the surrounding area, plus of course the building of sheds for their equipment which are usually not a very attractive asset to the area!
4. The field/land is not unused as stated, it is divided into paddocks & contains a number of horses who are visited daily by their keepers, by car of course.

5. We understand that the hedgerow running continuously between the field & Victoria Road is an ancient one & has been there for many, many years. I believe in the plans the developers intend to destroy part of this hedge to make an entrance (new one) into the development from Victoria Road.
6. Finally both the hedgerow & field contain a great variety of birds & wildlife which includes hedgehogs that are now on the decline! All these would be lost in this area if permission is granted & yet another OPEN SPACE ie field & habitat would be lost on Hayling much to its detriment.

We sincerely hope the proposed development will be refused & we can all enjoy the surroundings we now live in.

Yours sincerely

P. SAXTON MRS
