

17 December 2020

Dear Mrs Haywood,

I write to object to the New Planning Application APP/20/01093.

As a resident who will be seriously effected by the proposed 195 new houses which will result in increased traffic congestion in the local area, increased pressure on local health services and infrastructure, on emergency services, destruction of local habitats for wildlife which is what Hayling Island is famous for, and irreversible loss of highly productive agricultural land.

The well known local flooding issues can only be made worse by this plan.

Please bare in mind the foregoing and that it is the existing local residents who will have to put up with these problems and not the planners.

Yours faithfully,
