Planning APP/19/00889 - 7th October 2019 Tournerbury Woods

Dear Sir/Madam

I have tried to use your online portal but experienced problems with the link, so please find this email as my response/comment.

I have been a resident of Hayling Island for 35 years and shared with my children and grandchildren the natural beauties of the Island.

As most people like myself on the Island we are experiencing the dramatic changes in the development of the island, of which I understand you as the local council have to abide by the directives of the government to create dwellings. However I am appalled at the potential loss of the natural beauties of the island of which you the council are in control of.

I feel that creating a commercial venue with increased traffic accessing Tournerbury Woods over the natural Bury, which will not benefit the majority of the island, only the people creating it.

I feel that sacrificing the natural beauties i.e. The Bury, Nesting Heron's and Rooks, and other natural wildlife, seabirds and flora which are only found in this area of the island.

I feel that you as the council are in charge of this decision and hopefully recognise the importance of keeping this natural attribute of the Island safe.

Kind Regards
