

Dear Mr Eaves,

 have just heard about the proposed planning application for 1A St James Road.

I moved here from Bristol 18 months ago and love the area, the people, the shops in fact everything except for the parking. The amount of dangerous pavement parking is staggering in St James Road. I see wheel chair users and mothers with pushchairs have to walk in the road on many occasions. I have been blocked on my drive several times and on one occasion, cars parked on the pavement on a Friday afternoon, prevented me from being able to use my car until midday the following Monday. People park in St James Road from all over. I am very worried that the proposal for 1A St James Road will generate even more cars and parking issues.

I would therefore ask that any building is restricted in size and provides plenty of private car parking spaces.

Thank you for your consideration,
