

Ref: APP/21/00403

I would ask you that you refuse permission to works on 19 Fir Copse Road.

We have lived at number [REDACTED] for over 54 years and in all that time the properties have been bungalows with no upstairs extension nor dormers. This happening would spoil the look of the place and to the bungalows along our side of the road. These plans sounds awfully big and excessive and not in keeping.

All the time we have lived here, I've only known these properties to be mostly owned by [REDACTED]. This is really whom they are ideal to be owned by and probably the purpose they were built for. [REDACTED]

[REDACTED]

The effect of the plans appear to mean that we would lose light on the side of our property mainly to our bathroom and conservatory. We would also be overlooked in our garden and conservatory again causing us stress.

The new owners of number 19 have three means of transport, two parked in their front garden and another constantly on our shared drive. They've been leaving it there as they've bought a bigger vehicle that no longer fits in their garage. The parking in the area is poor, my visitors have to park in Frances Road. I need my access to the back my garden. One of their vehicles needs to go in their garage off our shared drive. I am wondering and guessing they may plan to knock the garage down and stay parking on the shared drive without our agreement, like they are doing now without our permission.

[REDACTED]

I can only see this being more of an inconvenience and unfair to our neighbours and mainly us. I would prefer them to keep their property to one level and sort their parking out.

Kind Regards
