Subject: Further comments on planning application APP/15/00378
Importance: Normal

With respect to the above planning application, apart from the addition of an ecological survey to the documents, we have not found any additional information on the council website regarding the issues that have been raised by ourselves and by other representations that have been made.

Consequently, our concerns regarding the demolition so close to our property as laid out in our previous comment of 29/5/2015 still stand.
In addition the lack of dimensions together with the inconsistencies on the drawings still give us some concern, as do omissions of the location of drainage and sewage services mentioned in other representations.

In view of the apparent lack of revised information and drawings, we reserve the right to make further comments when adequate information is available.

Mr R J and Mrs J C Wheeler
