Reference Planning Application APP/21/00296 Mobile Phone Mast

I enclose two photographs which show the area about Saint Catherine's Road, Park Road and Sinah Lane where Hutchinson 3G propose siting a 15 metre Street Pole and supporting cabinets, immediately adjacent to the existing footpath.

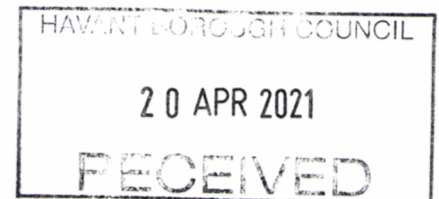

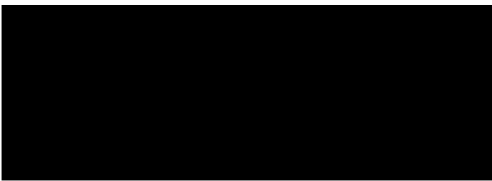

I wish to object, strongly, to the proposed installation of a piece of highly obtrusive, industrial equipment into a semi-rural, domestic location, particularly when there exists a far more appropriate location on an industrial estate not half a mile away.

The impact visually and environmentally of this intrusive monolith will detract from the nature of the area not only for the housing in the immediate vicinity but for anybody who passes through what is currently a pleasant route to the Western part of the Island.

There is a significant risk of it impacting unfavourably on the value of property prices surrounding this location and a question over reported detrimental effects on resident's health of transmissions from mobile phone masts.

Inevitably, the intention to submit planning for this equipment, will be linked to the proposed building of 195 houses at the rear of Sinah Lane and North Shore Road and whilst the provision of additional digital capacity may be justified, the proposed location cannot.

I would, therefore, ask that the Planning Application be turned down and a more suitable site proposed.
