17th December 2015

We live in The Deck House adjacent to Tamarisk and regret to say we are going to have to object to the proposed plans for a house on the site of Tamarisk on the grounds of design, appearance and layout and the effect of daylight, privacy and outlook to The Deck House. If the proposed plan goes ahead we will have a sheer flank wall measuring approx. 19m long x 7m high which on the 1st floor extends approx. 2 and half meters south of our bedroom window of The Deck House.

To the north the wall extends approx. 2m beyond our north facing bedroom window, then carrying on from this wall an open raised terrace approx. 7m long x 12m high. As we are retired, if the proposed planning goes ahead we will lose the light, privacy and enjoyment and pleasure of our garden.

We have no objection to a house being built on the site of Tamarisk if restrictions are applied regarding bulk, building lines and is built within the limits of The Deck House.

Yours sincerely

Margaret and Ray Stewart
