ON ATTACHED SHEET :

Pruning works to two Macrocarpa at Dolphin House Dolhin Quay Emsworth PO10 7BU

Reason for work reduction of wind catch to manage risk of failure, preserve longevity and amenity value of trees

The two trees were planted and kept originally as a low hedge and through mis management have grown into large trees with many furcated stems which have weak unions. On T1 one such stem has a 0.5m longitudinal fracture and will need to be removed

There is historical evidence of storm damage and current branch failure suspended in the tree

The trees are on an exposed site and growing on a poor site area

They overhang a well used footpath ,new development a high risk target area

The pruning works applied for would mitigate the potential for failure which is reasonably foreseeable if left unchecked

Although long term removal would be the best option to allow for a more suitable planting and

Negate the risk of failure causing injury or worse
