Havant Borough Council  
Ref- APP/17/00179 ( 8 London Road 2 bed Bungalow )

Dear Mrs D Haywood,

I note the following on drawing 17/01/PO1. The proposed bungalow now has a fully hipped roof and has been lowered.

I also note that there is a roof light shown to the north bedroom which is not shown on drawing 17/01/P02. This second drawing also gives the height above ground level of the eaves/top of window as 202. Were the Planning Authority contemplating permitting the proposed development, since the bungalow is very close to my property the roof window should also be of obscured glass.

I note that on the drawing 17/01/PO2 a fence and hedging is shown as a boundary treatment. Is this the present hedge or a newly planted hedge ?

The fence is planned to be only 1.8m. The fence adjoining my property would be better at 2m high with any planting of a hedge on the land of the development and that these requirements should be referred to in conditions attached to the permission and such condition or conditions should require the continued maintenance of the proposed boundary treatment.

I also notice that Southern Water are suggesting that the sewer is diverted. That could prove difficult and expensive whilst also scuppering my chance of building in my garden.

My previous objections still stand.

Yours faithfully
