Dear Sir

re: Planning Application APP/18/00724 - Sinah Lane, Hayling Island

I wish to object to the above planning application on the following grounds.

The A3023 is almost at capacity now and the Council continues to increase dwellings (and traffic) on the Island by permitting the development of single occupancy dwellings into multiple occupancy flats. e.g. The Hayling Billy site, a chalet bungalow on Station Road which is now two blocks of flats, and numerous redevelopment sites on the Sea Front.

Hayling has few job opportunities and the development will add a significant number of commuters to the rush hour traffic.

Should the development go ahead there will be the need for hundreds of large delivery vehicles to deliver the building materials and remove spoil etc and this will have a seriously adverse affect on the traffic flow. The A3023 is scarcely more than a country lane.

When Hayling Island grinds to a halt the whole area is seriously affected and I think this should be taken into account when planning proposals are considered.

There are also infrastructure issues regarding sewage, water supply and Doctors which should be solved prior to any future development.

Yours faithfully
