Re: APP/13/00765, relating to present fenestration on eastern extension of 46 New Brighton Road, Emsworth.

Dear Sir/Madam,

I wish to object to the top window, situated in the apex of the eastern extension in question:

Firstly, because it was not shown on the plans for the enlargement of 46 New Brighton Road, which were eventually approved on appeal.

Two narrower windows, then in situ, and now bricked up and replaced by the present one, were clearly situated below. There was no window planned above them.

Secondly, because the present window is in a position above the two original windows, it is in a more prominent position, and thus commands a sweeping view into houses and gardens at the back of no. 46. It faces directly into the main bedroom of my house, and so it greatly reduces the privacy of that room.

In addition, I should also like to point out that, on the eastern most extension of no.46 New Brighton Road, there is a window that faces directly into my lounge/living room, and so my privacy is also greatly reduced in the main room on the ground floor.

Yours sincerely,
