RECEIVED

Objection - APP/19/00427

Dear Sir

I object to building on Lower Road Old Bedhampton for the following reasons

1) Good practice is to build on brownfield sites before greenfield. At present it is not necessary to use H2O as other land can be used and it should be a last resort.

2) Local planning has a statutory obligation to provide housing and safeguard heritage. Bedhampton is unique in the borough with heritage assets that need to be preserved. Building on H2O would have a serious effect, degrade the setting and once started can't be reversed.

3) Prematurity of application. This application seeks to get an advantage

by being Lodged before the Old Bedhampton Conservation Area Review is concluded and by avoiding an Examination in Public by an independent inspector of the borough, which is scheduled in the autumn of this year.

There are many other reasons including road safety and I therefore object to planning application APP/19/60427.

Yours Sincerely.
