

HAVANT BOROUGH
COUNCIL

19 DEC 2019

RECEIVED

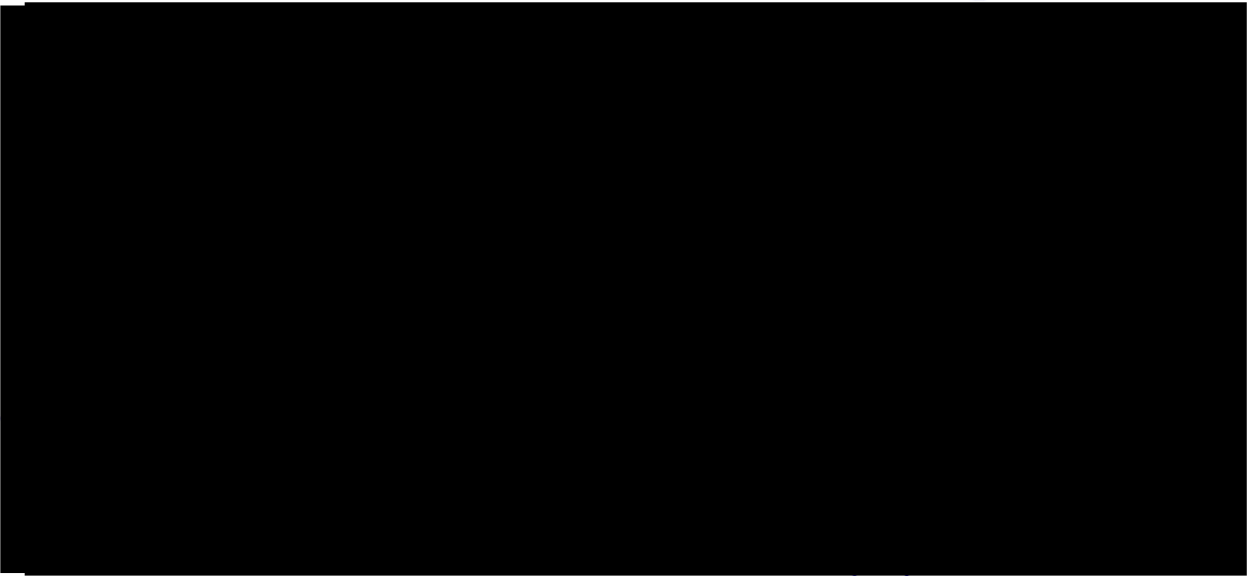

Dear
Ms D SHEATH.

In reply to your letter Ref
APP/19/01194 advising me of the
proposed extension to 33 Crystal
Way I am writing to object to the
extension being built for the
following reasons.

My main concern is the
overshadowing and loss of light
to my property due to the height
of the new roof (much higher than

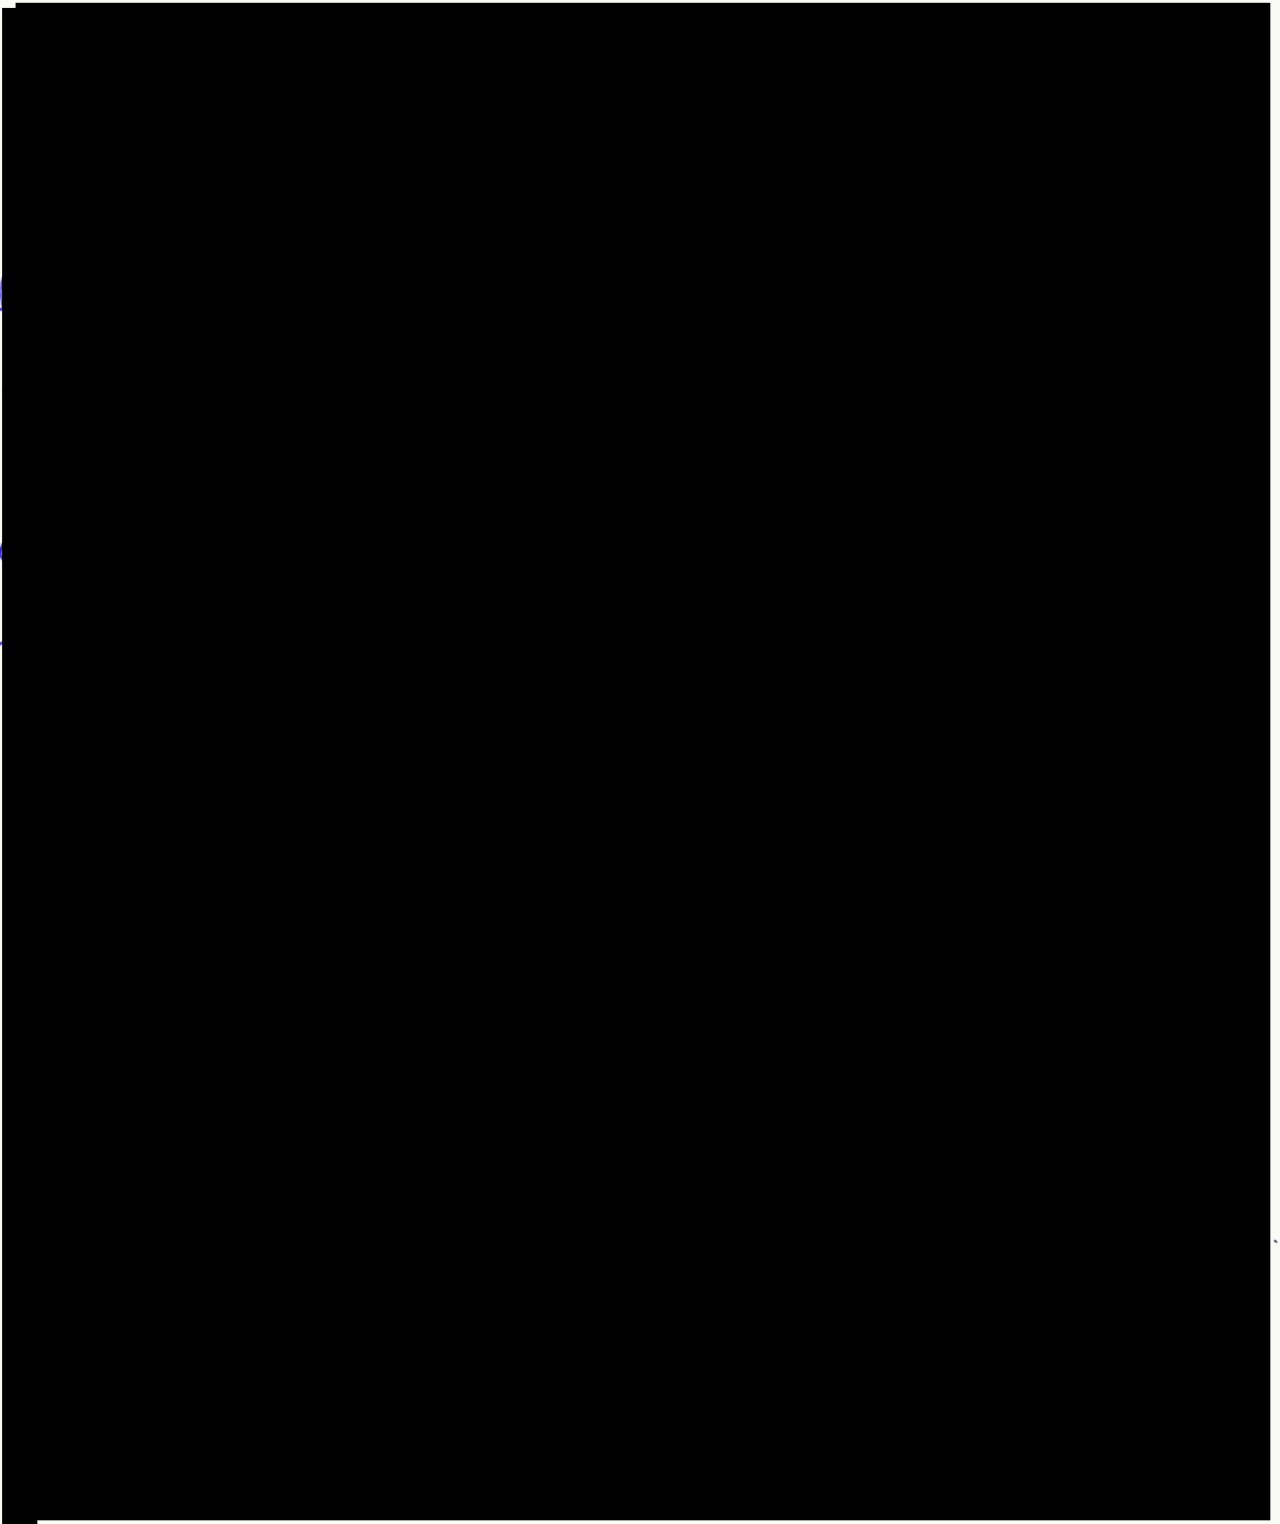

present conservatory) and the overall size of the extension.

As the rear of our properties are westfacing my natural light will be severely effected not only to my garden and conservatory but most importantly to my kitchen.

Loss of natural light to my kitchen will mean I will have to have a light

on at all times.

We are all asked to do our bit to help save our planet, my garden is a haven for wild life taking many years to establish, not only do I have many species of bees, butterflies and birds but also a hedgehog. These are all encouraged into my garden by the many plants and flowers I grow which all need some daily sunshine to flourish which I will

lose making it difficult for the plants to grow and my garden will no longer be a welcoming haven to my wildlife.

I also feel that the extension is not in keeping with the existing block of 4 terraced houses and will be obvious and easily seen when coming around the bend of the cul-de-sac.

I am also concerned it will devalue my house and make it more difficult to sell.

I do hope you will visit me at my home to see for yourself the reasons for my concerns.

Yours Sincerely
