Dear Sir,

Environmental Agency Planning Application
Southmore

I have been notified that a Planning Application has been submitted.

The proposal to breach the seawall will destroy the continuity of a national trail: The Solent Way, forcing its route inland. It will destroy the continuity of a much enjoyed seafront walk.

It will create a tidal marsh where there is existing pasture of special scientific interest.

The current damage to the seawall is minor and can easily be repaired.

I wish to register my strong opposition to the Planning Application.

Yours sincerely
