Subject: 48 Alameda Road extension plans

Good afternoon,

We are the owners of number 50 Alameda Road and understand plans have been submitted to erect a two story rear extension, alteration and extension to the roof in order to create habitable accommodation which includes a barn hip to the front & rear of the property - 48 Alameda Road.

However, looking at the plans we do have some reservation regarding the following :

- two story rear extension could affect natural light and privacy to our garden/property
- alteration to the roof which incorporates additional living accommodation - we are concerned that natural light to our own property will be affected
- privacy issues if additional windows included to the left side of said property
- style proposed maybe be out of character to other dwellings in the road - only single story rear extensions noted in Alameda Road

Our property is very close in proximity to 48 Alameda - also believe our property sits slightly lower than number 48 Alameda therefore, natural light and privacy is a real concern; having only purchased our property in October 2015; we do feel slightly uneasy about the prospect of a two storey rear extension when one of the main purchasing considerations was the amount of natural light/privacy to our garden/property.

Many thanks for your consideration in this matter.

Kind regards,

Christine Elsbury & Kevin Henwood
