

Good morning

I have just enjoyed a walk from Emsworth across the fields to Westbourne on which there is planning application to build houses.

This path is totally unwalkable in winter as the ground is too thick with mud so seems absolutely ridiculous to build houses on such ground. It is also a very enjoyable walk away from traffic and an area for families to use.

I strongly support the opposition to this application. APP/18/00672

Best wishes
