Categories: Orange category

I would like to object to the development due to the risk of flooding of the river Ems which will have a disastrous effect on our home and property as we will not be able to cope with the additional water from the building of these properties as the river goes through our property.

Also I believe the site would use a sustainable urban drainage system which relies on holding rainwater beneath the road before releasing it. In Winter the water table is only 40cm below the surface, so there would be nowhere for the water to go.

The environmental agency has been working hard on improving the flooding of Emsworth and this development would be a backward and negative step to all the hard work which has been done and is in the process of being done.
